-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

Art Unit: 2665

1. The applicant is requested to submit a Form PT0-1449 listing all patents, publications, or other information listed in the **Original Patent** and/or the **Reissue Patent** for consideration by the Office.

2. The amendments filed on November 29, 2004 failed to comply with 37 CFR 1.173 (b) (2) and (d) (1), which state:

(b) Making amendments in a reissue application. An amendment in a reissue application is made either by physically incorporating the changes into the specification when the application is filed, or by a separate amendment paper. If amendment is made by incorporation, markings pursuant to paragraph (d) of this section must be used. If amendment is made by an amendment paper, the paper must direct that specified changes be made.

(2) Claims. An amendment paper must include the entire text of each claim being changed by such amendment paper and of each claim being added by such amendment paper. For any claim changed by the amendment paper, a parenthetical expression "amended," "twice amended," etc., should follow the claim number. Each changed patent claim and each added claim must include markings pursuant to paragraph (d) of this section, except that a patent claim or added claim should be canceled by a statement canceling the claim without presentation of the text of the claim.

(d) Changes shown by markings. Any changes relative to the patent being reissued which are made to the specification, including the claims, upon filing, or by an amendment paper in the reissue application, must include the following markings:

(1) The matter to be omitted by reissue must be enclosed in brackets.

Art Unit: 2665

To be more specific, all subject matter being deleted from original patent **claims 1-14 must be placed between brackets.**

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by TEMPLE in Technical Report, entitled "The Design of A Ring Communication Network", University of Cambridge, January 1984, Pages 105-132 (of record).

By broadly interpreting the function code and channel number within each mini packet as the claimed type field and source identifier field within each fixed length slot, TEMPLE discloses an apparatus for transmitting variable length message on a network from a source to a destination in fixed length slots, providing a segmentation machine for segmenting variable length message into fixed length slots including the provision of source identifier field in the header of each slot including codes uniquely associated with the message to be transmitted, and a reassembly machine for reassembling the message according to the identifier codes in the slots (see page 107, line 7 to page 112, line 28) as in claim 25.

5. Claims 19, 20, 22, 30-32, 34-38 are allowed.

6. Applicant's arguments filed May 12, 2004 have been fully considered but they are not persuasive.

In the remark of the response filed May 12, 2004, regarding 102(b) rejection to claim 25, the applicant merely stated that there is no teaching or suggestion in the Temple reference of

Art Unit: 2665

placing a destination address in the message segment of a mini packet. Accordingly, the claim is not anticipated by Temple. The examiner disagrees since in Figure 8.3a or page 110 of the Temple reference, it clearly shows that the format of the minipacket does include destination address with source address, function code, and channel number.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alpus H. Hsu whose telephone number is (571)272-3146. The examiner can normally be reached on M-F (5:30-3:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D. Vu can be reached on (571)272-3155. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
